

CREA

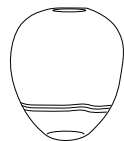

2016

Vaso soffiato a bocca, caratterizzato da un anello interno ottenuto a caldo con la tecnica della membrana che separa la parte superiore satinata da quella inferiore lucida. Per ottenere la particolare forma organica, il vaso viene aperto e scolpito a mano sulla parte superiore per creare quelle ammaccature che lo rendono unico e irripetibile.
Disponibile in due colori, amber e blue-grey.

Mouth-blown vase, characterised by an internal ring worked with heat with the membrane technique that divides the satinized upper part from the lower polished part. To obtain the organic shape, the vase is opened and hand-carved on the upper part to create those dents that make it unique. Available in two colours, amber e blue-grey.
